Appendix B: Additional Monitoring Data

Tables B.1 and B.2 present results from the second draw samples collected during the period of the Lead and Copper Rule compliance sampling. Additional monitoring data presented in Attachment 2 to this report contains sample data collected from other DC Water programs that focused on lead, copper, or other metals that included lead sample results. A description of the program followed by the data set is included in Attachment 2.

Notes:

- 1) The Washington Aqueduct (WA) laboratory supplies sample bottles to DC Water for lead analyses. DC Water also purchased sample bottles for lead analyses to supplement the WA

supply during high customer request periods. We mistakenly ordered a batch of bottles with caps containing a foam liner and delivered some of these containers to customers for LCR monitoring. Sample containers with foam liners had not been evaluated and approved for trace LCR analyses, thus the WA laboratory recommended that the containers with foam lined caps not be used. DC Water rejected these LCR samples, contacted the customers, and asked them to collect the samples again.
